

ACC1-25 25 units
 ACC1-125 125 units

DESCRIPTION

AirCare Automation's Small System Console intelligently monitors and controls an AirCare VariPhase™ or ACMxxxx fan interface. The console provides communication (MODBUS-RTU platform), unit control, and system monitoring in one easy-to-use package. With the AirCare Console™ no programming is necessary to install a network. The console will automatically scan the network and the units/system can be configured through a simple menu driven format.

The single zone AirCare Console™ has 2 models that can control up to 25 or 125 VariPhase/ACM addresses.

ACS2308
 Power adapter

Functions / Features

- o Self-configuring upon power up
- o Individual speed adjustment
- o Global speed adjustment
- o Global set-back speed adjustment
- o Central monitoring of fault sensors (pressure drop on AC, RPM drop on EC type)
- o Menu driven configuration options
- o Monitors units and identifies error modes
